0 of 0 people found the following review helpful. decent book but could have more info. By dan lewis If you really want to understand all the core information on growing the best meds than I'd get a different book. This is a good beginners book but could have a lot more info. It has the main cores to hydro, in and outdoor, pest control, supplys, and some facts. So it's a good book just could be more organized and with more info and details. Kinda seems unorganized how it was written. I'd probably give it a 3.5-7/50 of 0 people found the following review helpful. The Right Product. By Robert Wright It's all ways nice to get the right product and it help out as well. Fast Shipping. Like this one. Thank you. 0 of 0 people found the following review helpful. Five Stars By Pamela Weld Very informative.

Cannabis Cultivator demystifies the subject of growing pot by treating it as though it were conventional gardening. Clear, step-by-step instructions guide readers through everything from setting up the garden to the supplies needed to which systems work best. Whether growing indoors or out, starting with seedlings or clones, using hydroponic or organic systems, Jeff Ditchfields lively, jargon-free writing provides all the answers budding growers need. Lavish

photography brings the entire process to life, from propagation to curing a harvest.
